Square Paws is a product design company specializing in unique pet furniture of impeccable quality.

At Square Paws, we feel that pet furniture should be part of your home environment and not a completely foreign object. That's why our cat towers are made to delight both pet and owner.

Each piece is designed by an architect and hand-crafted in the USA.

The strength of our products is a sense of whimsy. We take iconic elements, whether architectural, utilitarian, sculptural, or natural, and we fashion them in a form that pets can interact with. It's in this tongue-in-cheek way that our customers feel engaged with their pets in a totally new way.

As part of our social responsibility, we pledge to donate 10% of net profits to agencies dedicated to animal rescue and refuge.

Square Paws is currently sold exclusively online via the Square Paws website.
